

## **IMPORTANT NOTE FOR POSTING YOUR VIDEOS ON YOUTUBE:**

When posting a video on YouTube, it's crucial to use relevant keywords in your title to ensure that your content reaches the right audience. This means incorporating popular words and phrases that people often search for. For instance, if you're uploading a motivational video about consistency, include the words "motivational video" in the title. This way, when users search for motivational videos on YouTube, your video is more likely to be suggested to them.

Similarly, for storytime channels, use keywords like "African folktales" or "horror story" to help your video appear in search results. Avoid random titles and focus on optimizing your video for search engines. Feel free to draw inspiration from similar channels in your niche and use their strategies to improve your video's visibility."
